Surveys and Maps (Geographic Names)

A representative of the staff of the Domestic Names Committee has asked us to check on the UNCOMPAGRE MOUNTAIN or UNCOMPAGRE PEAK in the Uncompahgre National Forest. The 1951 Forest map uses the generic "Mountain", the 1935 Forest map uses "Peak", the U.S. Geological Survey map published around 1903 uses "Peak", while a board decision implies the use of "Mountain". The U.S. Geological Survey is preparing to publish a sheet in the area and it would be desirable if some decision could be made on this matter.

It will be appreciated if you will investigate this feature name for local usage, background information, and other factors, and report your recommendation at your earliest convenience.
